

FERROUS CARBONATE FEED GRADE

Chemical formula: FeCO₃

Molecular Weight: 116

CAS: 563-71-3

H.S CODE: 2836999090

Specifications

Fe	36-38.5%
As	10PPM MAX.
Pb	50PPM MAX.
Cd	10PPM MAX.
FINENESS OF POWDER	60-120MESH
FINENESS OF GRANULE	20-50MESH

Description: white granular or powder

Storage / Toxicity

Storage	Sealed, in cool and dry place
Toxicity	Non toxic

Application

FeSO₃ is a mineral additive in animal feed. As a blood tonic substance to livestock, it can stimulate the growth of animal's body. It can also be used to make pigment such as red ferric oxide etc. Granule material is good fertilizer, which can effectively improve soil, move moss and lichen. It also is used as pesticide for prevention of pathological changes of wheat and fruit tree. Meantime, it is the catalyst making plant green and important for plant absorption.

Package

In 25kgs bags net each.

Or as customer's requested.
