

MASTERCHEM LIMITED

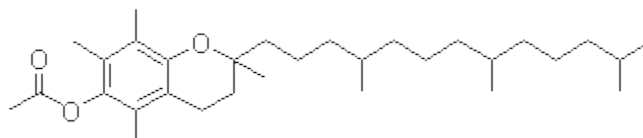

VITAMIN E 50% POWDER ACETATE

CAS No.: 7695-91-2

Molecular Weight: 472.75

Molecular Formula: $C_{31}H_{52}O_3$

Structural Formula:

Property:

Off white or pale yellow powder or granulated powder, moisture absorption easily. Vitamin E is a nutrition enhance, enhance the immunity of livestock and poultry. It can effectively promote the nucleic acid metabolism and the protein synthesis, increase the body function.

Specification:

Description	White or yellowish crystalline powder
Loss on drying	5% max
Content	50% min

Usage:

Feed grade vitamin e 50% is widely used in poultry farm and cattle feed, it is used as vitamins feed additives in feed industry.

Packing and Storage:

Vitamin E is packed in 25KG bag and should be stored in cool place.

Shelf life:

2 years in original packages under the described conditions.

Keyword:

Vitamin E acetate powder 50% min, DL-alpha tocophery I acetate powder
